## PROFESSIONAL SUMMARY

---

Junior Software Developer with hands-on experience building responsive web applications, developing scheduling tools, and automating workflows. Strong background in React, Next.js, Node.js, and database management. Proven ability to collaborate with cross-functional teams and deliver high-quality solutions in Agile environments.

## EXPERIENCE

---

### Associate

10/2022 – 10/2023

*Infosys*

*Mississauga, ON*

- Spearheaded development of dynamic web features, translating 50+ user stories into seamless, production-ready components.
- Engineered solutions for real-world business challenges, collaborating closely with QA and design teams in fast-paced Agile sprints.
- Diagnosed and resolved critical front-end and back-end bugs, improving application reliability and user satisfaction.
- Bridged the gap between technical complexity and user needs, presenting design updates to stakeholders with clarity and precision.

### Software Engineer (Internship)

07/2020 - 07/2021

*Ontario Power Generation*

*Bowmanville, ON*

- Designed and deployed internal scheduling tools that optimized nuclear fuel storage operations and informed strategic planning.
- Streamlined documentation workflows by automating daily reporting processes, enabling faster sign-offs by field engineers.
- Communicated technical concepts effectively across multidisciplinary teams, driving the adoption of innovation-driven solutions.
- Secured buy-in from leadership for new digital tools by pitching value propositions to non-technical executives.

## PROJECTS

---

### Saood-Imran.com

12/2023

- Built a professional-grade portfolio website using React and AWS, integrating a secure contact form with anti-spam protections to streamline inbound opportunities.

### MovieZen (Capstone)

03/2022

- Developed an AI-powered movie recommendation platform, combining chatbot-driven conversations with sentiment analysis algorithms to personalize recommendations and drive engagement.

### Autumnae Shop

03/2025 - Present

- Architecting a mobile-first e-commerce platform using Next.js, Supabase, Express, and Stripe, with a focus on secure transactions, dynamic product management, and an intuitive admin dashboard.

### AniRename

04/2025

- Engineered a Python-based desktop app to automate media library organization, featuring a Tkinter GUI, API integration, caching layers for efficiency, and undo capabilities for safe operations.

## EDUCATION

---

### Ontario Technology University

Oshawa, ON

*Bachelor of Engineering*

*04/2022*

## SKILLS

---

**Languages:** Python, JavaScript, HTML5, CSS

**Frameworks:** React, Next.js, Node.js, Express.js

**Databases:** MongoDB, MySQL

**Tools:** AWS, Git, Agile Development, REST APIs

**Others:** UI/UX Collaboration, Debugging, API Integration
